

Chiti Nkhuwa

AWS Cloud & Machine Learning Engineer | Data Scientist | Digital Transformation

Lusaka, Zambia · cnkhuwacn7@gmail.com · +260 762 338 468
Open to global remote roles and relocation

PROFESSIONAL PROFILE

AWS-certified Cloud and Machine Learning practitioner with an MS in Business Analytics and 5+ years of experience across fintech, mining, and data analytics. Holds AWS Certified Cloud Practitioner and AWS Certified AI Practitioner credentials; currently pursuing AWS Certified Machine Learning Engineer — Associate. Background spans digital product strategy, data science, ML model development, geospatial analysis, and mining sector operations in the United States. Open to remote and global roles; French speaker (DELF B1 certified, B2 in progress).

EDUCATION

Master of Science — Business Analytics Grand Canyon University, Phoenix, Arizona, USA	Completed
Bachelor of Science — Accounting Minot State University, North Dakota, USA	Completed

AWS CERTIFICATIONS & TECHNICAL CREDENTIALS

AWS Certified Cloud Practitioner Certified 2025 · Amazon Web Services	AWS Certified AI Practitioner Certified 2025 · Amazon Web Services
AWS Certified ML Engineer — Associate In progress — 2026	SuperDataScience — Machine Learning & AI Completed
DELF B1 — French Language Certified Jun 2026 · B2 in progress (Dec 2026)	

TECHNICAL SKILLS

Cloud — AWS	EC2, S3, Lambda, SageMaker, IAM, VPC, RDS, CloudFormation, ELB
ML & AI	PyTorch, TensorFlow, Scikit-learn, XGBoost, LangChain, FAISS, CNNs, LSTM
Languages	Python (primary), SQL, R
Data & Geospatial	Pandas, NumPy, GeoPandas, Folium, Kepler.gl, Matplotlib, Streamlit
Engineering	Git, GitHub, REST APIs, LLM integration, Microsoft Dynamics 365
Human Languages	English (native) · French (DELF B1; B2 in progress)

PROFESSIONAL EXPERIENCE

Chief Digital Officer (CDO) Kashompa Enterprises Limited · Lusaka, Zambia	Sep 2025 – Present
- Lead digital product strategy and technology roadmap for a BoZ-licensed money-lending fintech, advising the CEO and Board on platform direction and system priorities. - Oversee loan management system and core technology infrastructure, ensuring operational continuity and planning future-state architecture. - Manage cybersecurity posture, data protection compliance, and IT governance in a regulated financial environment (BoZ, FIC). - Assess emerging technologies and translate business requirements into actionable technology decisions.	
Staff Accountant Nevada Copper Mines · Yerington, Nevada, USA	Apr 2023 – Aug 2024

- Operated within a large-scale US copper mining operation — developing direct domain knowledge of mining workflows, operational data structures, and site-level financial architecture.
- Cost analysis, fixed asset management, and month-end close using Microsoft Dynamics 365.

Data Analytics & Business Optimisation

Dec 2022 – Apr 2023

Nevada Successful Solutions · Sparks, Nevada, USA

- Built regression-based credit analysis models in Python; delivered actionable business insights to support strategic decisions.

Accounting & Analytics Roles

2019 – 2022

Zambia & USA

- Accounting Clerk, Umoja Community Education Foundation; Associate, JC Graphics & Web — AR/AP, financial reporting, and analytics.

SELECTED PROJECTS

Mineral Resource Prediction · Mining / Geospatial ML

- Geospatial ML pipeline for mineral exploration targeting — K-Means clustering and XGBoost with interactive GeoPandas and Folium visualisations. Domain knowledge informed by direct US mining sector experience.

Battery Classification System · Computer Vision / PyTorch

- PyTorch CNN for battery type classification supporting automated recycling optimisation.

AI Notetaker · Agentic AI / Cloud

- Cloud-based agentic application for audio transcription and structured summarisation, deployed on AWS.

Smart Leaf Disease Detector · Computer Vision / AgriTech

- CNN-based image classification model for automated plant disease detection from leaf imagery.
